

The ESJ Network Interaction Group

322 Sunlight Drive, Leicester, NC 28748 Tel: (828) 683-0313 Fax: (828) 683-3511 E-mail: cay@electric spacecraft.com

MAIN OBJECTIVE

To develop practical space travel through:

- Electric/magnetic propulsion techniques
- Gravity research
- Energy transformation techniques
- Atomic structure research
- Phenomena investigation
- Basic principles of understanding

MEMBER QUALIFICATIONS

An informal willingness to exchange ideas and information with other active members in order to perform exploratory and interdisciplinary research and understanding among individuals interested in the development of space travel.

The network while open to all is primarily to aid those actively interested and involved in the development of space travel in the broadest sense. An evaluation of member activity will determine the extent to which the membership is working toward this objective. Members who take advantage of the network by consistently acquiring information and failing to communicate their own research or critique of understanding will be dropped on the premise of unwillingness to interact. The primary objectives of the network are to learn, understand and develop ideas for mutual benefit.

BENEFITS OF MEMBERSHIP

The *ESJ* network administrators will connect researchers doing similar work. Researchers possessing different talents and means can then work together to further their investigations. This will be a difficult and scattered task and it will take an enormous effort by all involved to make the administrative function work for everyone.

- As individuals and groups of researchers provide results, we will be able to document and catalog the research, and provide critiques by sending the results to networkers who have volunteered their time and expertise to review the work.
- The network members can receive informal reports providing accounts of the various investigations underway. This working interaction will allow the network members to keep up with what is going on, and possibly provide insight into their own work.
- Certain researchers may need additional contacts, such as a mathematician or a model builder. The network can provide the names of members who are willing to offer assistance in these areas.
- When papers or reports are written, the network can provide a secure and permanent location to file and record the work.
- Members will have access to their files and reports and to those of others which have not had any restrictions imposed.
- Through the *Electric Spacecraft Journal*, members have the means to publish their findings and have their work recognized by readers around the world.

PERSONAL QUESTIONS

Your response to personal questions is purely voluntary. Failure to answer all questions will not preclude you from being a member of the network; however, such information will be helpful, and may be essential if contact or work with another member is desired.

All personal information is kept in confidence, unless you authorize its release to other members. We cannot control any use of your personal information once it is released to another member. However, members using information in an offensive manner will not be tolerated.

CLASSIFIED MATERIAL

Persons involved in confidential or proprietary research in connection with the government or industry must not submit such information for publication or dissemination.

CATEGORIES

Please check any which apply to you. Number selections in the order of importance/preference. Add specifics where needed. For example, if consultation is checked, note your area of expertise: such as math analysis, physics analysis, a specific administrative talent, etc. At your discretion, and as a matter of privacy, you are not obligated to answer all items.

PROFILE

Birth Date _____ Birth Place _____
year month day

Name _____
first middle last

Address _____ City _____

State _____ Zip _____ Country _____

Phone(s) _____ Fax _____

E-mail _____ Website _____

Languages other than English (Note proficiency) _____

BACKGROUND

Education _____

Occupation _____

Affiliations (organizations, agencies, memberships, etc.) _____

Focus of research and exploration interest _____

Degree of research activity (related to focus of interest)

- Casual (strong interest, but not top priority for free time/resources)
- Sporadic (occasionally a top priority for free time/resources)
- Continual (consistently a top priority for free time/resources)
- Dedicated (the first priority for free time/resources)

Best talent (related to focus of interest) _____

RESOURCES

Available machinery _____

Available instruments _____

Available lab space _____

Available shop space _____

Information resources _____

Computer capability _____

INTERACTION PREFERENCES

- I prefer to interact with individuals of my choice
- I prefer to interact with individuals of a select classification (interest, education, etc.)
- I prefer contact through an intermediary
- No restrictions
- Other _____

Preferred method of contact

- Phone
- Fax
- Mail
- E-mail

Preferred time of contact _____

CONSULTING AVAILABILITY

Would you be willing to offer consulting to those working in your field of interest/expertise?

- Yes
- No

COMMENTS _____

AVAILABILITY AND OWNERSHIP OF INFORMATION

The *ESJ* Network is operating with the resources of the *Electric Spacecraft Journal (ESJ)* and its parent corporation, Electric Spacecraft, Inc. (ESI). However; information provided by network members is in no way considered to be the private property of *ESJ* or ESI. All information remains available to the group members. The only exception is information which is specifically designated by a member to be for a personal, restricted file which is not to be distributed.
